

# HANJIN DB-8

# HANJIN DB-8

Terratest's fleet of Hanjin DB-8s offer clients a multi-purpose, track-mounted drill rig. The DB-8 can undertake all geotechnical drill methods including wireline and conventional diamond coring, solid and hollow augers, as well as SPTs and Ud Tubes. The DB-8 has a small footprint and rubber tracks, enabling it to travel across undulating and boggy terrain. The rig can also traverse across and along rail tracks, making it the perfect unit for work within the rail corridor.

As is standard with all the Terratest's drill rigs, the DB-8 has a safety cage with electronic-hydraulic interlock of rotation.

## SPECIFICATIONS

---

Length Travelling	6,400mm
Height Traveling	2,000mm
Height Drilling (min)	6,400mm
Width	2,400mm
Weight	5,500kg

---

Diesal Engine	40Kw
Rotary Drive Torque	3,530Nm
Pullout Capacity	8,000kg
Auger Speed	100rpm
Coring Speed	850rpm
Drill Stroke	3,500mm
Main Winch	2,000kg
Wireline Winch	500kg
Water Pump	120lpm@5,000kPa
Footclamps	Hydraulic
Headswing	Hydraulic
Jack Legs	4
Dump Mast	Yes
Safety Cage	Standard

## AVAILABLE FROM

---

Brisbane  
Newcastle  
Sydney  
Melbourne  
Adelaide
